

American Society for Precision Engineering (ASPE)

Application for Individual Membership

To apply for individual membership to ASPE, download, print and complete the application on pages 1 and 2 of this document and either fax it to (919) 839-8039 or mail it to the following address:

ASPE
P.O. Box 10826
Raleigh, NC 27605-0826
USA

To apply for Corporate Sponsorship, please download, print and complete the Corporate Sponsorship Application located on the ASPE website.

You must complete sections I, II and VIII to be considered for membership in ASPE. Please be sure to complete the payment information in section VIII. Your application can not be considered without this information. If paying by check, make it payable to the American Society for Precision Engineering. The other sections (III through VII) are optional. ASPE uses the optional information to better serve its members by planning meetings around its members' interests and by locating members with specific expertise.

A **Sustaining Member** receives all the benefits of a Regular Member. In addition, they are distinguished for their additional commitment to help ASPE advance the art, science and technology of precision engineering. This very special class of members will be recognized on the ASPE website and at the Topical and Annual Meetings.

A **Regular Member** receives the quarterly *Precision Engineering Journal* and has access to the "Members Only" section of the website, which includes a searchable database of members. Regular Members receive a discount on the Topical and Annual Meeting *Proceedings*. Of course, the biggest benefit is the opportunity you have to contribute your expertise to the precision engineering field, as well as meet others in the profession who can share their expertise with you.

A **Student Member** receives the benefits of a Regular Member. ASPE strives to enable students studying precision engineering to become involved in the Society, so membership is granted at a reduced fee for student applicants who can provide proof of their student status. A current university student identification card is required when applying for student membership.

By making a tax deductible donation to the **ASPE Education Fund** you can support student participation at the Society's Meetings by providing funds for ASPE to supplement the costs of the students' registration fees at the Topical and Annual Meetings. The education and support of the next generation of precision engineers is important to the precision engineering discipline. You can use this application to make that donation. Just complete Section III of the application and write the amount of your contribution in the space provided. If paying by check, make it payable to the American Society for Precision Engineering.

After your application is approved and your membership fee is processed, you will receive your new membership package, which includes a certificate and a membership card. If you make a tax deductible donation to the ASPE Education Fund, ASPE will mail you a receipt to the address specified in Section III.

Membership in the ASPE is good for one year. If you have questions, send e-mail to ilka_lee@aspe.net or call (919) 839-8444.
