

American Society for
Precision Engineering

Become a Meeting Sponsor in San Diego

Dear ASPE Member,

The American Society for Precision Engineering (ASPE) is devoted to the advancement of precision engineering and its dissemination through education and training worldwide. I am thrilled to announce that we are preparing for our **40th Annual Meeting**, which will take place in **San Diego, November 3-7, 2025**. This event is a cornerstone of the precision engineering community, bringing together leading experts, researchers, and industry professionals from around the globe.

The Annual ASPE conference focuses on multidisciplinary study and application of high accuracy components and systems, such as precision controls, metrology, nanotechnology, precision optics, scanning microscopes, and semiconductor processing. Our annual meetings are held with over 150 papers presented in oral and poster sessions with 300+ delegates representing academia, industry, and national laboratories. If **your organization** is looking for precision engineering talent and technology, you will find it here.

Your organization is invited to sponsor this prestigious event, providing you with a unique opportunity to gain visibility and connect with a highly targeted audience of industry leaders and innovators. Here are a few comments from previous sponsors and exhibitors:

“This is a premier group from industry, national labs and academia. Through the student challenge, the tutorial program, technical sessions, meals and social events, the attendees engage with the technology of Precision Engineering and engage with each other. We want to be associated with this event.”

“We were able to recruit an excellent senior mechanical engineer, saving thousands of dollars in recruiting fees.”

“There is an enthusiastic pool of Bachelors, Masters, and PhD level engineering students participating in the Student Challenge. As sponsors, we value the opportunity to interact with them, be inspired by their energy, and consider which to pursue as employees.”

“We met with people from the national labs. Over time it led to multiple projects, one over \$750k.”

“This conference has the most technical people who are at the beginning of the development process.”

“We have sold \$30 million of machines to one customer through an ASPE meeting. In addition, we have learned insights from colleagues at ASPE that have improved our machines.”

We offer sponsorship levels from Bronze (\$2,000) to Platinum (> \$6,000) designed to suit various levels of involvement and visibility as described in the flyer below. Your sponsorship will directly support the organization of the event, including the student challenge, keynote speakers, technical sessions, and networking opportunities. We also offer customized sponsorship plans that align with your specific marketing and recruiting objectives. We would be delighted to discuss these opportunities in more detail and explore how we can collaborate to ensure a mutually beneficial partnership in Precision Engineering.

Please use the following [Google Form](#) to indicate your interest or contact me directly so we can discuss how the ASPE Annual Meeting can have a positive effect on your organization.

Warm regards,

Senajith (Seno) Rekawa
